

LSVT® Companion Software: The LSVT® Companion software offers exciting features that will help improve your productivity and enable your patients to assume a more hands-on role in their treatment progress. The new LSVT® Companion walks you through your initial and ongoing voice assessments while automatically collecting and analyzing your patients' voice data (pitch, loudness, duration). That means no need to spend half your treatment session writing down patient performance levels because the LSVT® Companion tallies your session as treatment unfolds!

You will receive a calibrated microphone to accurately record voice, and all of the software and instructions necessary to complete your assessment and treatment. All you will need is a Microsoft® based computer system*.

The LSVT® Companion is currently offered for: **\$659.99.**

The LSVT Companion will be shipped to you within 7-10 days upon receipt of your payment.

*The minimum computer system needed to install and run the LSVT® Companion is a Microsoft® Compatible 1GHz Pentium Class Computer with 512 Mb RAM, running Windows® 2000 SP4, XP SP2, or VISTA operating systems.
