

# Speech Treatment for Parkinson's and other neural disorders: **LSVT LOUD<sup>®</sup>**

You are invited to attend a two-hour interactive symposium on speech disorders and speech treatment for people with Parkinson disease (PD), with application to atypical Parkinson's (e.g., PSP), and other neural disorders.

This symposium is **FREE** so it is a wonderful opportunity for people with PD, family members and friends, and other healthcare professionals who want to learn more to attend.

The symposium will include a 1-hour lecture presented by world experts in speech treatment for people with PD and other neural disorders. This lecture will be followed by an interactive session where participants with PD, PSP, or other neural disorders are invited to interact with speech clinicians practicing vocal exercises (this is optional for participants).

**When:** Saturday, June 17, 2017

12:00 – 1:00 p.m. Lecture (detailed below) and Refreshments

1:00 – 2:00 p.m. Interactive Exercise Session (Optional)

**Where:** FOX Rehabilitation  
**FOX EDU Center**

7 Carnegie Plaza  
Cherry Hill, NJ 08003

This symposium is offered **FREE OF CHARGE**. Registration is limited.

## Lecture Summary

At least 89% of individuals with PD have a speech or voice disorder which can negatively impact quality of life. This presentation will:

1. Present the background and motivation for voice treatment in PD and other neural disorders.
2. Describe the creation of an efficacious treatment, LSVT LOUD and efficacy data.
3. Report on unexpected outcomes and discoveries.
4. Discuss application of principles of LSVT to intensive whole body amplitude-based training protocol for individuals with PD and other neural disorders (LSVT BIG<sup>®</sup>).
5. Demonstrate innovative technology to enhance accessibility of treatment for all people who can benefit.

*This research was funded, in part, by the National Institutes of Health and Michael J. Fox Foundation.*
